SKIN MANUAL CONTROLLER

Caution

- Measures to maintain normal fluid balance should be considered since open radiant warming cause insensible water loss.
- Infant should not be left unattended when used in manual mode.
- Do not force baby when needed in case of side panels are open.
- Do not ignore any alarm condition.
- Do not pull or tug sensor wire, connector, sensor element etc.
- Ensure the power supply is continuous, earthed, approved for hospital use and complies with voltage specifications of the warmer unit.

To
Life rescue Trust

Date : 31-07-2026

This is to certify that **Baby of Meenakshi (Newborn Male)**, S/o **Mr. Saurabh**, resident of **Jacopura, Gurugram**, has been admitted to **Girraj Ji Children Hospital** on **15 July 2026** under the care of **Dr. Mohit (Pediatrician & Neonatologist)**.

The baby is suffering from **serious medical conditions**, including:

- Respiratory Distress
- Birth Asphyxia
- Moderate to Severe Cerebral Dysfunction (HIE Stage II)
- Neonatal Complications requiring intensive care

Due to the critical condition, the baby requires **continuous NICU care, ventilator support, medications, and specialized monitoring**.

ESTIMATED COST OF TREATMENT (20-25 DAYS STAY)

Particulars	Estimated Amount (INR)
NICU Charges (₹6,000-₹7,000/day × 25 days)	₹1,50,000
Medicines & Consumables	₹40,000
Lab Tests & Investigations	₹20,000
Doctor Consultation & Procedures	₹25,000
Miscellaneous & Emergency Support	₹15,000
TOTAL ESTIMATED COST	₹2,50,000

Note: Cost may vary depending on the baby's condition and required procedures during treatment.

APPEAL FOR SUPPORT

The baby belongs to a financially weak family and is unable to bear the high cost of life-saving treatment. The newborn is currently fighting for survival and requires urgent medical care.

EXPECTED HOSPITAL STAY

20-25 Days (Approx.) depending on recovery and response to treatment.

AUTHORIZATION

This estimate is issued upon request for the purpose of **medical fundraising and financial assistance**.
